The Phone Billing for Windows

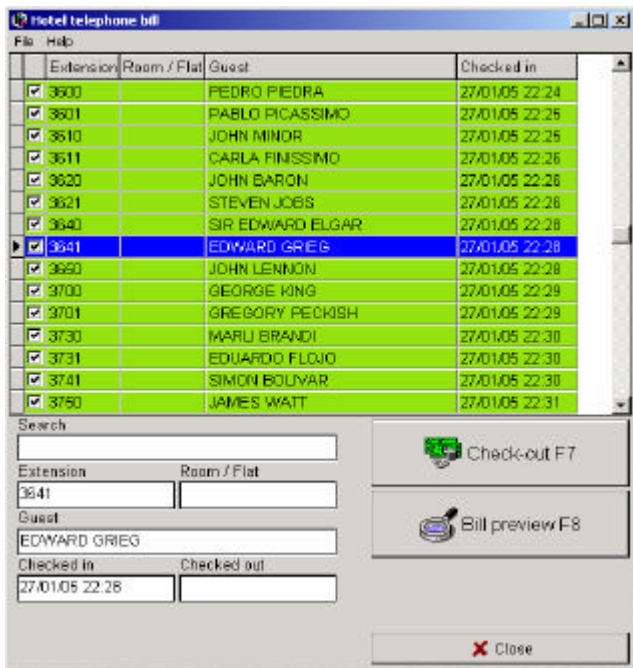

Telephone systems are an essential part of Hotels, Hospitals, Care Homes, Clinics, Serviced offices and shared tenancies.

Phone Bill will produce accurate and detailed Bills for calls made from all extensions. Call prices can include a profit margin and VAT if needed.

All call details produced by your telephone systems are stored by Phone Bill on the PC. Call charges are calculated according to cost tables or meter pulses. Cost tables can be updated by the users or by your system supplier. To produce a bill, select an extension number or name and click Checkout.

Check-in and check-out

Guests are checked-in and out with one simple screen. On checkout, a bill is printed and the calls are marked as billed, leaving the room ready for the next guest.

REF: BRGBPB4.PUB

Features

Shows name and number of extension, number called, duration and the cost of each call

Allows flexible department configuration

Call charging by meter pulses or by user maintainable price tables.

Adds a selectable mark-up to all calls

Compatible with all PBX and key systems.

Masks some dialled digits for privacy.

Admin calls can be reported at normal rates.

Audit reports can be produced to cross-check front office takings.
